                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Searched:
Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                March 11, 2004, 18:33:51; Search time 171.3 Seconds (without alignments) 860.386 Million cell updates/sec

Sequence 14, Application US/09543407

GENERAL INFORMATION:

APPLICANT: White, Aaron P.

APPLICANT: Doran, James L.

APPLICANT: Collinson, S. Karen

APPLICANT: Collinson, S. Karen

APPLICANT: Collinson, S. Karen

APPLICANT: Collinson, S. Karen

APPLICANT: Collinson, S. Karen

APPLICANT: Ray, William W.

TITLE OF INVENTION: BACTERIAL FIMBRIAL SYSTEM FOR

TITLE OF INVENTION: PRESENVATION OF HETEROLOGOUS PEPTIDE SEQUENCES

FILE REFERENCE: 20043-406

CURRENT APPLICATION NUMBER: US/09/543,407

CURRENT APPLICATION NUMBER: US/09/543,407

CURRENT FILING DATE: 2000-04-05

NUMBER OF SEQ ID NOS: 59

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 14

LENGTH: 151

TYPE: PRT

ORGANISM: Artificial Sequence

FEATURE:

OTHER INFORMATION: Recombinant Salmonella enteritidis 3b afgA

OTHER INFORMATION: sequence containing the replacement fragment

OTHER INFORMATION: encoding PT3 from GP63 of Leishmania major.

Regult No.

Score

Query Match Length DB

IJ

Description

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
